[Portfolio](#) • [LinkedIn](#)

Product UX/UI Designer with 5+ years of experience, including around 2 years in fintech products. I work with B2B and B2C systems: enterprise interfaces, mobile applications, personal accounts, CRM systems, and AI-powered services. I specialize in complex scenarios, information architecture, UX research, and designing scalable interface solutions.

SKILLS

Product Design: UX/UI, mobile & web, user flows, interaction design, information architecture, prototyping, design systems.

Research: interviews, UX audits, usability testing, A/B tests, CJM, personas.

Tools: Figma, Spline, Adobe Photoshop, Illustrator, After Effects, Webflow, HTML/CSS (basic level).

EXPERIENCE

KR DIGITAL / Senior Product Designer

May 2025 - Present

Digital studio specializing in creating innovative solutions.

Tasks:

Design and develop complex digital products for large corporate and government clients. Work through user scenarios, business logic, and new functionality with a large number of states and constraints.

Solution:

- Moscow Department of Information Technology: developed new functionality for internal task management systems (Jira equivalent) and knowledge management systems (Confluence equivalent). One of the largest modules was a workflow editor with validator and post-function configuration; worked through the structure, states, dependencies, and logic for configuring complex business rules.
- Mosoblgaz: developed the mobile and web personal account; participated in implementing a chat with an AI assistant.
- App for migrants: designed scenarios for tracking patent status and uploading documents.

Result:

- Translated complex workflow configuration logic - with validators, post-functions, dependencies, and business constraints - into a cohesive management interface.
- Designed and developed user scenarios for products with different audiences and domains - from internal corporate systems to mass-market mobile applications.

MINVEST / Middle+ Product Designer

July 2024 - February 2025

The first digital brokerage platform in Kyrgyzstan.

Tasks:

Launch an investment platform with an intuitive interface and attract 20,000 active users by the end of the year. Design a website and an internal CRM system for employees.

Solution:

- Designed the core functionality of the application for trading and analytics.
- Developed and improved the internal CRM system based on team feedback.
- Conducted UX research (interviews, usability tests, and A/B tests) to improve usability.
- Developed and improved the website, educational platform, and overall brand design strategy.

Result:

- Successful product launch and high activation conversion due to a clear interface and simplified registration process.
- Increased user engagement through improved UX; >20,000 active users by the end of 2024.

INTERBANK PROCESSING CENTER / Middle Product Designer

July 2023 - July 2024

Mobile financial application for payments and money transfers with an audience of more than 300,000 users.

Tasks:

Improve the usability and functionality of the application through redesign and the development of new services.

Solution:

- Redesigned the application, improving usability and visual appeal.
- Designed new features (government services section).
- Conducted research and usability tests to identify pain points and optimize interaction with banking services.

Result:

- Improved the usability of the application, which led to increased user satisfaction and engagement.
- Expanded the application's capabilities by launching new services and government services, which led to growth in new active users.
- Optimized application performance through redesign.

JETSTYLE / UX/UI Designer

April 2022 - July 2023

Participated in design development for projects in e-commerce, healthcare, and delivery services (mobile applications, websites, and online stores).

- Redesigned platforms, conducted UX audits and research; identified pain points and improved user scenarios.
- Product redesigns contributed to increased conversion and user engagement.
- Presented and justified design decisions to stakeholders and product managers.
- Developed UI kits, components, and interface elements.

FREELANCE / UX/UI Designer

January 2021 - July 2022

- Developed design concepts and interfaces for different platforms, prepared layouts, and adapted them for different devices.
- Conducted competitor analysis and user interviews; developed CJMs, personas, and empathy maps.
- Prepared presentations and justified design decisions to clients.
